GOLF COURSE OPENS: 8:00 AM

DRIVING RANGE OPENS: 7:30 AM

TEE OPEN: 1ST- 8AM

PRACTICE LOCATIONS: FRONT, BACK TEE

Plant Protectant/Fertilizer Applications:

Greens Tees Fairways Rough Aquatics

Golf Course Notes:

-Cart restrictions will move to cart path only at noon due to extreme heat. All turf is under enough stress with the above normal temperatures and humidity. We as a club need to protect the golf course to get through the rest of the season.

- Syringing of ALL playing surfaces will be occurring in the afternoon including greens, tees fairways and roughs. These irrigation heads will only be running for a few minutes at a time to cool the turf down. We will do our best not to running irrigation around golf but is particularly difficult especially with fairs.

-We will also be syringing greens by hose and by irrigation heads. DO NOT hit into a green with an employee watering. Wait until they leave the green complex. There will be consequences for hitting in while employee is working.
